PROFESSIONAL SUMMARY

Artificial Intelligence and Data Science undergraduate with strong hands-on experience in machine learning, data analytics, and software development. Proven ability to design end-to-end, data-driven systems and translate real-world problems into scalable technical solutions. National-level hackathon finalist with strong leadership, communication, and execution skills.

EDUCATION

Vignan's Institute of Information Technology
B.Tech in Artificial Intelligence & Data Science

Visakhapatnam, India
2023 – 2027

Aditya Junior College
Intermediate (MPC)

Kakinada, India
2021 – 2023

TECHNICAL SKILLS

Programming Languages: Python, C, Java, SQL, JavaScript

Machine Learning & Data Science: Scikit-learn, XGBoost, Random Forest, Feature Engineering, Model Evaluation, Data Preprocessing

Data Analysis & Visualization: Pandas, NumPy, Matplotlib

Web Development: Flask, HTML5, CSS3, Bootstrap, JavaScript

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook

EXPERIENCE

AI & Machine Learning Intern
Blackbucks Group of Companies

Jun 2025 – Jul 2025
Tirupati, India

- Built and evaluated machine learning models using Python and real-world datasets.
- Performed data preprocessing and feature engineering for improved model performance.

PROJECTS

Transformer Guardian -Transformer Monitoring system

2025

- Built an AI-driven predictive maintenance system to monitor 120+ power transformers.
- Trained ensemble ML models on 21,900+ records achieving 94% prediction accuracy.
- Implemented Dissolved Gas Analysis (DGA) using 9 gas parameters for early fault detection.
- Designed real-time dashboards for health scoring, fault diagnosis, and maintenance prioritization.

LivWell – Intelligent Livability Analysis Platform

2025

- Developed a data-driven platform to evaluate livability using environmental and socio-economic factors.
- Engineered a weighted scoring model and built Flask APIs for analytics and recommendations.

Mixora AI – Intelligent Concrete Mix Optimization Platform

2026

- Developed an AI-powered web application for predicting optimized concrete mix proportions using XGBoost and Flask.
- Built a responsive multi-page dashboard with real-time prediction workflows and engineering ratio analysis.
- Implemented machine learning preprocessing, model integration, and scalable backend architecture.

ACHIEVEMENTS & LEADERSHIP

Finalist, Piston Cup 2K25 National-Level Hackathon

Top 4 academic rank in the department

Winner, Vista 2K24 National-Level App Development Competition

Organizer, Vista 2K25 National-Level Technical Fest
